# BRIANNE DE DEUGD

STUDENT, FRONTEND DEVELOPER, WEB DESIGNER

Currently a third-year-student at Amsterdam University of Applied Sciences, on track to graduate with honors in 2025.

## WORK EXPERIENCE

2023

### Student Assistent at Amsterdam University of Applied Sciences

- Assisted in lessons for second-year frontend development students
- Tutored in the course frontend web development

2023

### Think Volunteer (Bali, Indonesia)

- Design research
- User research and A/B testing
- Website design
- Website development

2022 - 2023

### Dux Watches

- Worked in collaboration with Online Marketing Agency to write search-engine-optimized category pages and blogs

2021 - 2023

### TopRooster

- Wrote over 100 search-engine-optimized landingpages

2020 - 2021

### Intern / Day-A-Week Schools

- Planned and taught lessons to highly gifted fifth-graders in Amsterdam

2020 - 2021

### Yearbook Club Treasurer / Montessori Lyceum

- Led the design and outlay of the school's yearbook
- Led weekly meetings with students and teachers

2019 - 2020

### Website Translator / Freelance

- Responsible for the content and correct Dutch to English translation of several websites
- Worked closely with native English speakers

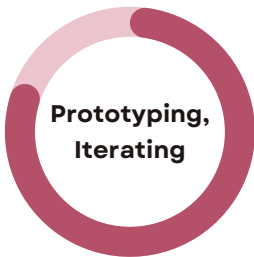

## FIELD SKILLS

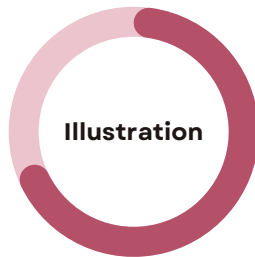

Working with designers as a programmer, streamlining digital designs with other media.

Commercial texts, translation, fiction, non-fiction, sourcing (APA, MLA) and processing.

Creating paper prototypes, building digital prototypes, user testing, reflecting and revisiting, UX/UI design.

Storyboarding, portraits, children's illustration, scenery drawings.

## CURRENT DEVELOPMENTS

### Programming

In my first year of university, I earned top marks for the courses **Internet Standards**, where I learned to code with HTML and CSS, and **Introduction to Programming**, where I learned to code with JavaScript. I also completed the **Tech Course** during year two, (backend and frontend development, Git, NodeJS, EJS), the tech-track of the minor **Information Design** (D3, SvelteKit, Vercel) and am currently completing the minor **Web Design & Development** (Human Computer Interaction, API's, browser technologies).

### Graphic and Visual Interface Design

**Incorporating design** into my career as a programmer has proven itself to be a great decision. I spent three months in Indonesia for the design and development of a non-profit's website. Additionally, my data visualization for the **Information Design** minor was one of three student-works featured at the international 2023 Information Design Conference.

## EDUCATION & COURSES

### EST. 2025: Bachelor Communication & Multimedia Design

Amsterdam University of Applied Sciences

### 2022: Various Adobe Tools Courses

Followed Adobe Tools courses provided by my university, where I learned to use Photoshop, Illustrator and more.

### 2021: GAP-Track Mentee NN Group

Worked with the communication advisor of Social Involvement on improving my professional skills in an office-setting.

### 2021: Higher General Secondary Education

Montessori Lyceum Flevoland

## PERSONAL PROJECTS

### The Web Design & Development blog

A blog I built with NodeJS, EJS and Vercel to keep track of the lessons learned during my second minor.

### Das de Bakker

A children's book I wrote with a fellow student and illustrated by myself, in which I applied my design process skills acquired during my time at university.
